

RENEWABLE FUTURE
PTY LTD

ABOUT

ENGINEERED RENEWABLE ENERGY SOLUTIONS for RESIDENTIAL, COMMERCIAL & INDUSTRIAL APPLICATIONS

WELCOME TO RENEWABLE FUTURE

THREE KEY AREAS OF EXPERTISE:

ELECTRICAL
VEHICLES

SOLAR

PROJECTS

ELECTRIC VEHICLE (EV) CHARGING

Renewable Future specialises in the supply & installation of Electric Vehicle (EV) Charging stations throughout Sub-Sahara Africa.

This division of the company focusses primarily on the Global Procurement, Local Design, Manufacturing, Supply & Installation of Renewable Energy biased EV Charging Stations.

By association we have long-standing relationships with manufacturers, in many cases spanning decades. This enables competitive, accurate sourcing and fulfilment of orders in accordance with all relevant supply-chain management through installation & commissioning considerations.

Given our strategic location in South Africa, which is part of the SADC (Southern African Development Community), our project turnaround times in Africa are shortened dramatically by comparison to other major supply countries.

Our goal is to be the "Go To" Electric Vehicle (EV) Charging Supplier to Industry in Sub-Sahara Africa.

SOLAR PV (PHOTOVOLTAIC)

Renewable Future provides Engineered Renewable Energy Solutions for Residential, Commercial & Industrial Applications in Sub-Sahara Africa.

This division of the company has highly trained Consultants & Engineers focussed on providing Engineered Renewable Energy Solutions for our clients.

Given we are primarily an engineering based company the deeper technical understanding of what is required when designing a Solar PV (Photovoltaic) System is the key feature that stands our company apart from the competition. We offer a full service from Consulting, Design, Install & Commission with Planned Maintenance Programmes to ensure long term optimal performance of the systems.

Our goal is to be the premier Solar PV Turnkey Company in Sub- Sahara Africa.

PROJECTS

Renewable Future provides EPC (Engineering, Procurement & Construction) services to industry in Sub-Sahara Africa.

This division of the company was started as a result of our clients requesting an EPC service for their projects throughout Sub Sahara Africa. The demand for "Local" Turnkey Engineered Solutions has driven the development of this division of our company.

Our goal is to offer clients a cost effective Turnkey (EPC) option for their projects.

Consulting beforehand & communicating with our clients throughout the entire TURNKEY PROJECT is critical to a smooth and hassle free end result.

CONSULTING BEFOREHAND & COMMUNICATING WITH OUR CLIENTS THROUGHOUT THE ENTIRE TURNKEY PROJECT IS CRITICAL TO A SMOOTH AND HASSLE FREE END RESULT.
